San Bonifacio area, the most suitable wine country for the Arcole D.O.C., characterized by a soil of volcanic origin, mainly composed of clay.

### HARVEST:

Completely harvested by hand in early-mid September.

### TECHNIQUE:

After a soft pressing, the must is left to ferment with grape skins into temperature-controlled (20-24°C) stainless steel tanks, for around 10 days. The wine ages for about 12 months into French oak barriques and for the last 6 months into bottles.

The taste is dry and full-bodied, with a notable structure.
